1st DUTCH HACKATON E-LOGISTICS

17 - 19 april 2015
Start @16:00
Launch Café, GRONINGEN

BUSINESS & TECH-HEROES!
Contribute to truly sustainable logistics for e-commerce

What's the deal?:
- Free admission
- Coffee and tea included, as well as at least one dinner and 'borrel'
- Great prices for winning group
- Fun side-events

More info and signing up at: www.hackdelogistiek.nl

Meet potential employers/clients and hack next-gen e-commerce solutions

E-commerce in the Netherlands is growing rapidly and as such is the flow of parcels that need to be delivered to consumers every day. Major challenge is to organize the logistics in a truly sustainable way, both economically and ecologically. The University of Groningen and logistics consultancy firm Districon turn to you for answers. By organizing the first Dutch hackathon e-logistics!

Districon will provide a case and grants you access to high-end optimization software to work out your ideas. Next to that, a major retailer, a large parcel carrier and a local logistical startup (names to be announced shortly) will each present* their own supply chain challenge from e-commerce practice. Thereby providing a set of unique and complex cases for you to hack!

*Presentations will be mainly in Dutch, but collaboration in groups can be in any language you agree on.

FREE MONEY FOR INTRAPRENEURS

We support intrapreneurs to make big co's innovate like startups.

13 Shares

€2500 GIVEAWAY

Actual statements from intrapreneurs we've worked with:

– "I can't spend 30 euro to use that software. I will never get approval for this."
– "I don't have any budget for a gift for our test users."
– "I need money for my prototype… boss said no…
And so on ….

It's our mission to support corporate innovators. This is not an empty statement. To make it very tangible we're giving away €2500 to cover small

CAN I JUST ASK FOR MONEY?

For the moment we'll limit this offering to intrapreneurs in large corporates (+5000 employees) who are working on an innovation project.

Just tell us in a few words what you need and we'll make the purchase for you. No need to share anything confidential. Use the chat window below, twitter @boardofinno or mail us via hi@boardofinnovation.com.

Some feedback afterwards if it helped you (or not) is appreciated.

Chat: How can we help you?

- **€5 x 20** *(20 left)*
- **€10 x 10** *(available from June 3)*
- **€50 x 5** *(available soon)*
- **€100 x 3** *(available soon)*
- **€250 x 2** *(available soon)*
- **€500 x 1** *(available soon)*
- **€750 x 1** *(available soon)*

HOW CAN I USE THIS MONEY?

That's more or less up to you. Some suggestions (but feel free to surprise us with other questions):

- 1 month of Linkedin Premium to use advanced filters to scout first leads.
- Pizza for your after hours meet-up with potential investors.
- Buy a research/market study of a specific industry
- A paid upgrade for Invision App to create a better prototype
- A book to donate to your project sponsor.
- …

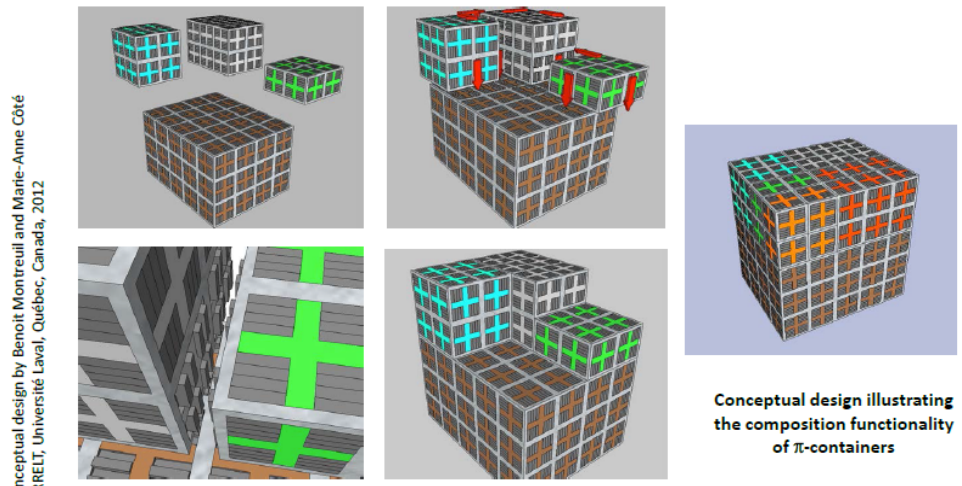
Physical Internet
Efficient Sustainable Logistics

An Open Innovation Initiative

Physically encapsulation of goods in π-containers
Easy to compose into composite containers, then to decompose



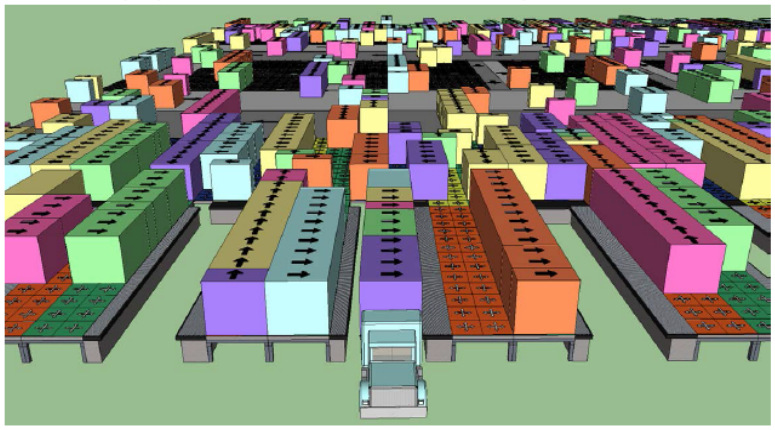
Conceptual design by Benoit Montreuil and Marie-Anne Côté
CIRRELT, Université Laval, Québec, Canada, 2012

Conceptual design illustrating the composition functionality of π-containers

The illustrated π-container design has a strictly conceptual and functional purpose: it has no prescriptive technical design and engineering intent

Logistics centers designed for the Physical Internet

Enabling seamless, fast, cheap, safe, reliable, & distributed, multimodal transport and deployment of π-containers across the Physical Internet



Road Hub of π-containers truck-to-truck crossdocking along a network of relays through the Physical Internet
