Curriculum Vitae

Viktor Andreas Venhorst, PhD.

As of April 2026

Personal details

Date of birth: May 21st, 1979
Place of birth: Almelo, The Netherlands
Nationality: Dutch

Contact (professional)

University of Groningen, Faculty of Spatial Sciences, department of Economic Geography
Visiting address: Landleven 1, room 5417.0223 (Building "Mercator")
Post: P.O. Box 800, 9700 AV Groningen, The Netherlands
Phone: +31(0)503638658
Email: v.a.venhorst@rug.nl

Affiliation current

Viktor Venhorst is Associate Professor at the Faculty of Spatial Sciences, University of Groningen. His research interest lies in the relationship between education, migration and individual and societal outcomes. The functioning of local labour markets is key in these outcomes.

His research therefore focusses on the longitudinal analysis of migration patterns and labour market outcomes of, in particular, higher education graduates. Building on this, his work covers the local relation between education institutions and the labour market.

Currently Viktor is projectleader for StudentLines. The project is funded by Nationaal Programma Groningen (6 million E). This Centre for Educational Data and Research is developed to support, encourage and facilitate research on longitudinal educational data, in full collaboration with educational instutions in the region. Viktor is also leading a workpackage in the project "Baanbrekend Perspectief", mapping out career trajectories among elderly workers.

Viktor is teaching in the Bachelor programmes HGP and SPD, as well as in two of the FSS Master programmes (Economic Geography and Population Studies), focussing on subjects such as Regional Labour Market Dynamics, Population Projections and Sustainability and quantitative methods.

Viktor is a Research Fellow at the Research Centre for Education and the Labour Market, University of Maastricht. He holds a PhD in Spatial Sciences from the University of Groningen (2012, Cum Laude). He has a background in Demography (MSc, Cum Laude) and Micro Economics (MSc).

Honours

Nominee on behalf of FSS University of Groningen Best Teaching Practice 2021.
Winner of the 2017 Faculty of Spatial Sciences Teacher of the Year competition.
Winner of the Regional Studies Association Award for Best International Conference Paper Early Career Category 2015, for the paper "Economic linkages between urban and rural regions - what's in it for the rural?", with dr. Gary Bosworth (University of Lincoln, UK).
Winner of the Best Referee Award 2013 for the journal Regional Studies
Winner of the 2013 Gratama Science Award

Finalist in the 2012 26th Charles M. Tiebout prize in Regional Science, with the paper "Human Capital spillovers in Dutch Cities: Consumption or productivity?"
Cum Laude: PhD in Spatial Sciences
Cum Laude: MSc in Demography

Research and Outreach

His PhD thesis (2007 – 2011) presents the first study for the Netherlands on the spatial mobility of young recent higher education graduates. On March 1st, 2012, it was successfully defended (cum laude). One chapter, the paper "Human Capital spillovers in Dutch Cities: Consumption or productivity?" won second place in the 2012 26th Charles Tiebout prize in Regional Science.

Scientific output from the PhD thesis was integrated with detailed city level survey information in the project "Higher educated in large Dutch cities: Brain Drain or Brain Gain?", in close cooperation with a consortium of five cities and NICIS Institute (now Platform31). This research project has helped cities re-focus their policies, demonstrating that Brain Drain in the Netherlands is not an issue.

On the basis of the thesis and the related work with Dutch cities, he was awarded the 2013 Gratama Science Award for "societally relevant and innovative research which has received public attention".

During his post-doc (2011 – 2014), he extended this research via the Platform31 project "Successful in the city", cooperating with ten Dutch cities and repeating the successful mix between papers and policy oriented output.

Using Statistics Netherlands registry data, he applied a longitudinal approach, focussing on issues such as the effects of student-entrepreneurship, cohort differences in the preference for urban environments and longitudinal regional labour market dynamics. In 2016—17 this lead to follow up projects, including a study into the spatial mobility of medical specialists. This latter project resulted in the passing of a motion by the Dutch House of Parliament (Tweede Kamer), asking the government to take regional peculiarities into account in the planning and organisation of medical training programmes.

Deepening the location choice part of his work, in the project Family Ties, with prof Clara Mulder, funded by ERC Starting grant no 740113, Viktor covers migration motives, including family and friends next to more classic economic migration drivers. He has contributed to a study on experiments on welfare schemes in relation to labour market and wellbeing outcomes. Further projects include the relationship between location choice, (international) backgrounds and economic behaviour in the Netherlands and developing economies, local cross-industry spillovers and relatedness, urban-rural linkages and inequalities through the ESSPIN Horizon project.

Viktor is regularly invited to hold (public) lectures. He was invited as an expert on panels such as "Knowledge Session Hospitalcare South-East Drenthe" (2018), and an inspiration session on labour market policies for the region Groningen-Assen (2020). Viktor's research has been reported on by Het Financieele Dagblad, BNR Nieuwsradio, Dagblad van het Noorden, 1Vandaag and Medisch Contact.

Supervision of PhD Students

Fieke Visser is working on historical trends in urban development (first promotor is prof Philip McCann).

Helena Barachino focusses on practial academic education in relation to the entry into the labourmarket (with prof Jouke van Dijk and dr Anneke Timmermans).

Steven Kema is working international graduates and stay-rates, and skills-education profiles (supervising with dr Femke Cnossen).

Amulya Hosur is working on conservation and projections for the Seychelle Warbler birds (with prof Hannah Dugdale and dr Stephen Adaawen).

Former PhD students who have completed
Dylan Jong completed his PhD thesis in 2021, on the financial position of local government in relation to regional economic and demographic behaviour (first promotor is prof Philip McCann).

Roselinde van der Wiel completed her thesis in 2022, on migration in relation to separation of couples, in relation to the presence of resident and non-resident children (first promotor is prof Clara Mulder).

Titissari Rumbogo completed her thesis in 2024. This thesis covered the interrelationship between geography, migration and individual financial behaviour such as remittances and saving, for the case of Indonesia. Promotores were Philip McCann and Niels Hermes (RUG-FEB).

Elda Pardede completed her thesis in 2025, on interregional migration in Indonesia (with prof Philip McCann and prof Clara Mulder).

Jonne Thomassen completed her thesis in 2025, on lifetime staying behaviour in a family context (first promotor is prof Clara Mulder).

Teaching
From January 2015 onwards, Viktor is responsible for the Statistics courses taught at the Faculty of Spatial Sciences (GESTAT1 and GESTAT2, 10 ECTS in total). At the master level, he teaches in the course “Regional Labour Market Dynamics” and “Population Projections and Sustainability”.

He also holds regular guest lectures in other bsc and msc level courses, partially on his research, partially on Statistics, thereby linking these quantitative methods courses to the content courses elsewhere in the programme. He has supervised 30 master thesis projects in the field of Economic Geography and two Research Master Individual Research Training trajectories.

He completed the University Teaching Qualification program in 2014, and will complete the Senior Teaching Qualification in 2024. He was Winner of 2017 Faculty of Spatial Sciences Teacher of the Year awards and the FSS nominee for Best Teaching Practice in 2021.

Management
Viktor serves as the Secretary of the Board of Examiners for the Faculty of Spatial Sciences.

He served as Director of Education ad interim in 2020, managing the Faculty of Spatial Sciences’ response to the Covid pandemic.

International activities and conferences
Viktor regularly serves as a reviewer for: Journal of Economic Geography, Journal of Regional Science, Annals of Regional Science, Journal of Rural Studies, Regional Studies (Best Referee Award 2013), Population Space and Place, Demographic Research, Papers in Regional Science, Spatial Economic Analysis, Region, European Planning Studies, Review of Regional Research. Letters in Spatial and Resource Sciences, Regional Studies Regional Science and Tijdschrift voor Economische en Sociale Geografie.

He was a Co-Editor of a Special Issue in ISI rated journal Spatial Economic Analysis on "Transitions and location choice: analysing the decisions of students and recent graduates" (2014, volume 9, issue 4), with dr. Maria Abreu (Cambridge University) and dr. Sierdjan Koster (University of Groningen). Viktor is a Co-Editor for the Springer edited volume "Frontiers in Interregional Migration Research", with prof. Alessandra Faggian, dr. Bianca Biagi and dr. Isha Rajbhandari.

Viktor is a member of: Regional Science Association International (RSA Nederland, AISre) and the Koninklijke Vereniging voor Staathuishoudkunde (KvS).

With various colleagues, he is a regular convenor of Special Sessions on migration and regional labour markets during conferences of the European Regional Science Association. These special sessions have resulted in the Special Issue in Spatial Economic Analysis mentioned above and a Special Issue in the association's Open Access journal Region. He regularly presents papers in conferences of the European Regional Science Association (including serving as a reviewer for young scientist Epainos Awards), the North American Regional Science Council (participated in invited sessions), the Western Regional Science Association, the European Association of Labour Economics (EALE) and the European Society of Population Economics (ESPE).

Research past
Viktor worked as a researcher on the Nicis project "Brain Drain or Brain Gain" (2009 - 2010), which resulted in new insights in patterns of (internal) migration of Dutch graduates.

Viktor has also worked as a researcher at the Population Research Centre (www.rug.nl/prc) on the project "Demographic trends and development of quantitative and qualitative housing needs in the northern provinces" (Demografische trends en ontwikkeling van de kwantitatieve en kwalitatieve woningbehoefte: een verkenning voor de noordelijke provincies). The project was funded by a consortia of housing corporations operating in the north of the Netherlands, AEDES and ODW.

Viktor holds a MSc (cum laude, October 2006) in Demography, from the University of Groningen. In his master's thesis he studied the financial and housing consequences of childbearing in the Netherlands. Next to this, he holds a MSc in Economics, specialized in Micro-Economic Policy, also from the University of Groningen. He wrote a master's thesis on the determinants of happiness.

Publication output summary
